

How To:

USE A PIR TO TRIGGER HEALTH & SAFETY WARNINGS

STEP 1

Make sure you have all the items on the shopping list above. The PIR will trigger your warning sound and the VoiceOff is a programmable audio unit which will be in charge of playing your messages.

STEP 2

Choose from a wide range of sound files on www.voiceoff.com to find your ideal sound or message and follow the instructions to put it the (included) SD card.

The great thing about the VoiceOff is you can customise it to whatever your needs are! It will open up a new range of opportunities for installations from health and safety right through to in-store retail promotions.

STEP 3

Wire the PIR & VoiceOff and mount in your chosen area.

Simple! A one time set up that means you can relax from now on about keeping to health & safety guidelines.

Order Code:
VOX200

Please Note

These "Technical Tips" help sheets aim to answer commonly asked questions in a concise and informative manner - they are for advice & guidance only and do not replace any of the manuals or other literature supplied with our products.
